Embedded disk array controller

The embedded disk array controller allows the data of a single damaged hard disk to be completing preserved without affecting system efficiency. For users requiring large data storage space, the SR4-TB2's RAID 5 provides the most cost-effective solution for data security and backup. The SR4-TB2 can be installed by following the simple steps in GUI, and users can select to use from the multiple modes, **JBOD, RAID 0, RAID 1, RAID 5, RAID 6 or RAID 10**. With the hassle-free software installation and setup, users can enjoy the large capacity and content safe storage right after formatting the hard disk.
